PROJECTS

VisionIQ — AI-Powered Face Analyzer | HTML5, CSS3, JavaScript, Face Detection AI [Live](#) | [GitHub](#)

- Shipped a live face-analysis product where all AI runs in the browser — no backend, no data uploads, full user privacy.
- Built real-time emotion, age, and gender detection with webcam streaming, dual-face comparison, and mood filters.
- Optimized on-device inference and UI for smooth performance across modern browsers and screen sizes.

CodeSphere — Complete CS Knowledge Hub | HTML5, CSS3, JavaScript, Vercel [Live](#) | [GitHub](#)

- Built an end-to-end free CS learning platform covering languages, domains, roadmaps, and career paths in one hub.
- Designed interactive try-it editors, quizzes, glossary, and client-side XP/badge progress without login or paywalls.
- Deployed on Vercel with a clear beginner-to-advanced structure so learners can navigate topics quickly.

ShopEasy — E-Commerce Front-End Demo | HTML5, CSS3, JavaScript [Live](#) | [GitHub](#)

- Built a shopping demo with product catalog, live search, category filters, and real-time cart in vanilla JS.
- Delivered a clean responsive UI from mobile to desktop without frameworks.
- Handled cart state and product filtering entirely on the client for a fast, install-free demo experience.

Sugar & Slate Patisserie — Client-Style Website | HTML5, CSS3, JavaScript, Vercel, SEO [Live](#) | [GitHub](#)

- Delivered a premium bakery brand website with gallery, menu, and celebration cake sections.
- Deployed on Vercel with SEO meta tags and social sharing setup for production hosting.
